Marie Dippon

Oakland, CA • (510) 459-4339 • marierose.dippon@gmail.com • github.com/marierosedippon • linkedin.com/in/marie-dippon-b00651264

Education

SAINT MARY'S COLLEGE OF CALIFORNIA Moraga, CA
BS in Computer Science, Minor in Communications, Full-Ride Scholarship Expected May 2027
Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Databases, Web Development

Technical Skills & Projects

Programming: Python, C, C++, Swift, JavaScript, TypeScript, Java, SQL, HTML, CSS.
Frameworks & Tools: Three.js, React, Vite, SwiftUI, FastAPI, Django, Firebase, Supabase, Socket.io, REST APIs, Git/GitHub, Xcode.
AI & APIs: LLM and multimodal API integration (Gemini, Anthropic), OAuth, Stripe. **Design:** Figma.

Forge: 3D Model Collaboration Platform 2026 to Present
Solo Founder & Full-Stack Engineer
- Building a browser-based, real-time 3D model collaboration platform for hardware engineering teams, with in-browser CAD/STEP file rendering in Three.js (React, TypeScript, Vite).
- Built a Supabase (PostgreSQL) backend with row-level security, Socket.io multiplayer presence, a Python FastAPI service layer, and Stripe billing.

ClipScout: AI-Powered Video Search iOS App 2026 to Present
iOS Developer & Engineer | github.com/Jeevyboi/clipscout
- Sole iOS engineer on a live App Store SwiftUI app that searches a user's video library with natural language using the Gemini 2.5 Flash multimodal API.
- Engineered batched parallel asset scanning (50 assets per batch, 5 concurrent Gemini calls, streaming partial results) to handle large photo libraries efficiently.
- Resolved production issues in model API versioning, MAX_TOKENS overflows, and image compression tuning; shipped through 8 build cycles and multiple App Store review rounds.

Variable-Grid Tic-Tac-Toe AI: Course Project 2026
- Implemented minimax with alpha-beta pruning for an n×n game engine in a team setting; authored a technical writeup of the algorithm design.

Relevant Experience

MUTUALS 2026 to Present
Co-Founder & Lead Developer
- Sole engineer on a SwiftUI iOS networking app with relationship tiers, live proximity features, and expiring connection timers.
- Built a 7-step onboarding flow and real-time sync on Firebase (Firestore, Auth) and a Django 4.2 REST backend on PostgreSQL, deployed to Railway.
- Managed TestFlight distribution and App Store Connect setup; submitted a Y Combinator application with my co-founder.

CLOSETLY
Freelance Web Developer & Content Strategist 2025
- Rebuilt and redesigned the company website as an external contractor.
- Helped develop a storyline-driven TikTok strategy that contributed to 16.6M+ views and 10K monthly downloads; covered by Social Growth Engineers (Jul 2025).

Leadership

XQ HOLIDAY GIFT DESIGN & ASSEMBLY PROJECT
- Led concept design, logistics planning, and cross-functional coordination to deliver the final product on schedule.
